

Order Picker License Penticton

Order Picker License Penticton - Order preparation operation or likewise called order picking as it is more normally known is a method used in warehouse operations and consists of staff called order pickers. The order picker's duty is to take and collect articles in specific quantities to be able to fulfill the client's orders previous to shipment. Order picking is an easy warehousing method. The efficiency in which this particular task is done could be directly connected to a supply chain's productivity. Thus, order picking is amongst the most controlled logistic methods. Order picking falls within the category of the warehouse management system.

There are particular types of order picking which include: pick to box method, wave picking method, picker to part method or piece picking, sorting systems method and zone picking method.

The pick to box method comprises the order picker filling the box with the stuff from his or her station. The box then moves to other picking locations until the client order is complete. In this particular process, there is no movement of the order picker employees. In the wave picking method, the order pickers move about in order to gather the required products for several orders. The picker to part method or piece picking is similar where the order picker or pickers move to gather the items needed but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, products are delivered to the orderpicker by an automatic system like an automatic storage system or a conveyor system. In the zone picking method, each and every order picker is assigned to one particular zone. They are responsible for just realizing order picking within this specific zone.
