

Toyota Forklift

Since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, has been the top selling lift truck dealer in the U.S. Proudly celebrating more than 40 years of service, the Irvine, California based business presents an extensive line of quality lift vehicles. Stemming from their history of excellence, reliability, and durability, Toyota remains prevalent in this aggressive market. Quality is the keystone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are built here.

All Toyota machines and parts built within North America adhere to the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its devotion to relentless development and its environmentally friendly systems. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift vehicles emit 70% less smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A.- Leading the Industry

The president of Toyota Material Handling, U.S.A., Brett Wood believes that TMHU's success comes from its dedication to produce high quality lift vehicles at the same time as offering outstanding client assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's biggest lift truck supplier and is among the magazines celebrated World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not a lot of other organizations and no other lift truck producer can meet Toyota's history of protecting the environment while simultaneously stimulating the economy. Environmental responsibility is an important aspect of company decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift vehicles. Yet one more reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more elaborate 2010 emission standards. The end invention is a lift vehicle that creates 70% fewer smog forming emissions than the present Federal standards allow.

Also starting in 2006, together with the Arbor Day Foundation, Toyota added to its dedication to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and neighborhood parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of dealers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Industry Leader in Safety

Toyota's lift vehicles offer enhanced output, visibility, ergonomics and durability, and most notably, the industry's leading safety technology. The company's System of Active Stability, also referred to as "SAS", helps reduce the risk of incidents and accidental injuries, in addition to increasing productivity levels while minimizing the potential for merchandise and equipment damage.

System Active Stability can perceive conditions that could lead to lateral volatility and likely lateral overturn. When any of these factors have been sensed, the SAS will instantly engage the Swing Lock Cylinder to re-stabilize the rear axle. This adjusts the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to prevent injuries or accidents while adding stability.

The SAS systems were initially utilized on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped drive Toyota into the lead for industry safety standards. Now, SAS is utilized on virtually every new internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with required operator training, overturn fatalities across all designs have decreased by 13.6% since 1999. Also, there has been an overall 35.5% reduction in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's measure of brilliance reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training course to help customers meet OSHA standard 1910.178. Training courses, video lessons and an assortment of materials, covering a broad scope of matters—from individual safety, to OSHA rules, to surface and load conditions, are offered through the dealer network.

Toyota's Commitment to The U.S.A.

Toyota has sustained a permanent presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment

Manufacturing, produced its 350,000th lift vehicle. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of property. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service parts, with the total investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and clients of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a training center.

Leader in Customer Service and Satisfaction

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations throughout the United States, providing the most comprehensive and inclusive client support and customer service in the industry. The company's new and Certified Used lift trucks, service, components, and financing capabilities make Toyota dealerships a one-stop shop to guarantee overall client satisfaction.
